Login to post You might like to try it first. Do not hold down. Do not hold down. Click the Copier button on the screen. The error will be cleared. If your tech savy I might be able to guide you through a code reset. ThanksPress copier, function at top of display , CLEAR, ERR then OK. Power down and back up again the copier. If error continues then the fixing film assembly will have to be replaced.Sounds like there is moisture in your paper.

It dries out after going thru the fuser section on the first pass so on the second side the paper is dry and the copy will look alot better.Now if you have the system software for the 3300 and the utilities and know how to load it,, then yes, the hard drive itself is compatible. If you have a hard drive you can use, and no ability to load system software, then call a technician and tell them you have a harddrive and you need system software loaded. If you do, set the iR3320 up to forward the faxes to an email or ifax address another name for a email address. Set the other machine to receive the emails sent to the previously mentioned email address. Your other option is to set the iR3320 up to forward the faxes to a folder on a computer. In this case you can open and view the faxes and if you want them on paper, send the job to another printer. This setup is rather tricky, so unless you have a really really really clued up I.T. guy, i would recommend that you have a Canon technician set this up for you.
