Book Descriptions:

We have made it easy for you to find a PDF Ebooks without any digging. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with 3m 740 gas detector manual . To get started finding 3m 740 gas detector manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

3m 740 gas detector manual

Apart from its ability to detect up to four gases at a time, the 740 series detector features a bright, readable display, precalibrated sensor replacement packs, and heavy duty construction. Monthly calibrations are standard. Program comes with instrument. CSA approved. 740 sensor pack purchased separately. The 740 Series features three separate alarm indicators, sensor replacement packs and extra heavyduty construction. Rechargeable lithiumIon or Alkaline AAA batteries. Key features include vibrating, audible and visual alarms alert the user of gas presence, massive archiving feature for up to six full months of stored data, measure OX, CO, HS, EX, and intrinsically safe rated CSA. Class 1, Division 1, Groups A, B, C, D; T3.WARNING This instrument helps monitor for the presence and concentration level of certain specified airborne gases. Misuse may produce an inaccurate reading which means that higher levels of the gas being monitored may be present and could result in overexposure and cause sickness or death. For instruments with an oxygen sensor installed, misuse may produce an inaccurate reading where lower or higher levels of oxygen may be present and cause sickness or death. Each person using this equipment must read and understand the instructions in the User Instructions before use. Use of this equipment by untrained or unqualified persons, or use that is not in accordance with the User Instructions may adversely affect product performance and result in sickness or death. To be used with CSA approved 740 detector. To be used with CSA approved 740 detector To be used with CSA approved 740 detector. Call or Email us and we will make sure you get the right product or part for the job.All Rights Reserved. Terms of Use Privacy Policy Site Map Other Site Maps go BACK TO TOP. Phone 206 2640808. Fax 206 2644921 Website.There are no batteries, hoses, pumps, or equipment to calibrate. Simply put it's smart technology that you can count on to do its job, so you can focus on doing yours. The 3M 740 detector offers a quality instrument with a low operating cost, which is good news for your employees and your business. Unsurpassed Convenience The 3M 740 detector makes it easy to replace sensors with a unique PreCalibrated 3M Smart Sensor Pack. Why bother with individual sensors when you can replace all the sensors with one convenient insert in minutes. Built Tough Tough jobs demand tough equipment. The 3M 740 detector is built with a rugged circuit board design and a heavy rubberized casing that helps deliver superior durability and protection against dropping, dust and liquids. Safety First We've equipped the 3M 740 detector with a 95 dBA alarm, dual red LED warning lights and a vibrate mode to get immediate attention in a busy work environment. Maximum Endurance The 3M 740 detector features remarkable staying power with longlasting lithiumion batteries. Now, you can rely on your detector to provide over eighteen hours of run time. What's more, you can easily swap in three 3M recommended AAA alkaline batteries on the job if needed. Great Features and Accessories All 3M 740 detectors come with standard rechargeable Liion battery, charger adapter, visual, auditory, vibratory alarms, data logging, rugged

alligator clip, infrared port, gas test hood, and instruction manual. Easy Maintenance Stay ready with simply the push of a button over time or with heavy use, sensors in any gas detector need to be calibrated or replaced. The 3M 740 detector test mode helps ensure your unit is accurately measuring the target gas.<http://ecotraveltour.com/images/comanche-rov-manual.xml>

The 3M 740 detector sensors are stingy when it comes to using calibration gas for testing. With a recommended flow rate of 0.2 liters per minute, the 3M 740 detector can help reduce your overall operating costs. 3M recommends the 740 detector be bump tested or sensor tested every day before use to help ensure accurate operation. Long Memory The 3M 740 detector's long memory allows you to maintain more than 1000 hours six months of data on usage, exposure levels, and other important site conditions. Speed and Convenience The 3M 950 detector allows the user to instantly install any 5 of the 18 available sensors, reducing the need for purchasing and maintaining more gas detectors. With the ability to accept any of 18 3M Smart sensors in just seconds, it can help save time and money, and increases your ability to adapt to changing conditions fast. Do Not Use For Monitoring for gases other than those which the instrument was designed to monitor, or in atmospheres where oxygen concentrations are below 12 % when equipped with Carbon monoxide CO or Hydrogen Sulfide H₂S sensors. Prolonged exposure to high levels of target gas may prematurely degrade sensor performance. It is designed to provide continuous monitoring of the ambient environment for Carbon Monoxide CO, Hydrogen Sulfide H₂S or Oxygen O₂, depending on which sensor is installed in the instrument. The gas detected by the sensor installed in the instrument is identified on the label located on the front of the unit and the sensor symbol on the LCD display. Calibrating O₂ prior to use in the same environmental conditions as the instrument will be used will increase the accuracy of the instrument's gas concentration reading see Calibration Verification Test and Calibration section. An internal microprocessor controls the indication and alarm functions in response to the signals received from an electrochemical sensor permanently mounted inside the unit.

When turned on, it continuously monitors the ambient air that enters the sensor through the sensor inlet opening by the process of passive diffusion. If the level of the target gas detected by the sensor reaches a factory preset alarm point, the unit will alarm see SPECIFICATIONS section. The 110 monitor is a battery powered unit utilizing a permanently mounted, nonrechargeable 3.6volt Lithium battery. It is designed to be intrinsically safe. The 110 monitor is CSA US certified intrinsically safe for Class I, Div. I, Groups A, B, C, and D Hazardous Locations. The 450 Detector is available in ten versions to detect Oxygen, Hydrogen, Hydrogen cyanide, Sulfur dioxide, Hydrogen sulfide, Chlorine, Carbon monoxide, Nitric oxide, Ammonia, Nitrogen dioxide. Gases detected by the sensor installed in the monitor are identified on the label located on the front of the unit. Do not monitor for gases other than the one for which the instrument was designed to monitor or in atmospheres where oxygen concentrations are below 12% except the oxygen sensing detectors. Prolonged exposures to high levels of the target gas may prematurely degrade sensor performance. The 450 Detector can be fit with a hand pump. To connect the pump to the detector, attach the tubing to the hood. Squeeze the hand bulb continuously. Some of the monitors are intended for HVAC monitoring, garage, warehouse and maintenance facility monitoring. Some of the units are stand alone monitors and others are designed to work with separately mounted control panels.
